

**Gordon Giltrap - Shining Morn  
Floating World Records**

With a reissue campaign ongoing, including *The Peacock Party & Airwaves* on one disc, (check out Edsel Records), it just had to be the right time for a glistening new album from GG - stuffed full of quintessential Giltrap instrumental guitar mastery. You will either enjoy it or you won't! While being mainly a solo artist, Gordon has fronted his own band in the past and played with a host of equally talented musical maestros, including Rick Wakeman who appears here on the outro version of the title track. This is a gentle journey within 24-tracks, in fact it is a totally relaxing and thoroughly enjoyable experience as Gordon displays another side of the art of the lead guitar - just listen to the magic of *Roseberry Topping*. No arms circu-

lating like a windmill or leaping around like a mad man here - it doesn't have to be like that. All that's needed is a talent and dexterous fingers to bring the best out of the strings stretching from a body and across a neck. You either have it or you don't and yet again GG shows us that he has just that! **MH**
